27 July 2005

To whom it may concern

Zeafruit Company has used the services of Turners Transport since our establishment in May 2000. Since that time the relationship between our two organisations has continuously gone from strength to strength. Turners Transport are specialists in produce freight and their understanding of not only the needs of Zeafruit but also of our customers, pack houses and growers is what sets them apart from the rest.

Zeafruit procures and markets fruit from over 400 growers from Gisborne in the East to Hohora in the far north. We use Turners Transport for all of our orchard to packhouse and packhouse to market freight requirements in the Bay of Plenty, Auckland and Northland regions. Considering the very high number of consignments that we do, we find the service level to be very high.

I have no hesitation in recommending Turners Transport as a produce carrier specialist.

Yours Sincerely

Terry Peachey
